This tool displays the info about the analyzed hardware/software.Testicular mass with left-sided hydrocele in infertile men with normal karyotypes. Recurrent spontaneous testicular torsion (SGT) is a newly recognized cause of male infertility. The aim of the present study was to examine the clinical usefulness of SGT in infertile men, especially with normal karyotypes, and its correlation with spermatogenesis. From 1987 to 1998, a total of 1814 infertile men (age range 23-66 years) with azoospermia were subjected to SGT for both testicular torsion and detorsion. Of the 1814 infertile patients, 197 (10.7%) were proven to have SGT. The study subjects were divided into two groups: Group I consisted of 171 infertile men who had SGT with azoospermia (SGT/AO) and presented with normal karyotypes in their sperm specimens; and group II consisted of 26 infertile men who had SGT with teratozoospermia (SGT/TM) and presented with normal karyotypes. The mean sperm count of group I was significantly higher than that of group II, and the positive rate of SGT/AO in group I was significantly higher than that of group II. Although there was no significant difference of the mean sperm count and positive rate of SGT/AO between the two groups of men, the mean

age at diagnosis of SGT/AO in group I was significantly younger than that in group II. The clinical features of infertile men with SGT/AO differed from those of infertile men with SGT/TM. A testicular mass with left-sided hydrocele in infertile men is suspected to represent SGT, but this hypothesis cannot be confirmed or refuted without testicular sperm extraction.CBS This Morning Gerrymandering means fewer Democratic seats, but both sides wait While Democrats are licking their wounds over the results of midterm elections, Republicans are on the march. As we wait to see if a Republican Senate majority will be achieved or not, the GOP has the momentum in key legislatures nationwide, and it's not hard to see why. Republicans have been winning more redistricting than Democrats in the last six years, a statistic that bodes ill for Democrats
