I would like to make a project like that in avidemux? I don't know Avid, but there are a variety of options available on the web. How do I make a custom spinifex template in Adobe Audition CC? You create the template. Then you add whatever titles you want. Update: I just realized I was a bit vague. If your only experience with Audition is the DJ template that's in the free version, the template you choose under Preferences > Audio Library > Import covers most of what you need. Here's the dialog from the Preferences > Audio Library > Import dialog. And this is the dialog from the Create Template dialog.
